technician tip

It's Critical to Always Replace (NEVER REUSE) the Special Sealing Components (Core, Cap, Nut, Grommet)

- Rubber grommets are designed for a **single use**. Over time, they take a shape, and lose their ability to properly seal. They are no different than the rubber washer in your faucet at home. Over time they take a shape and start to leak.

Snap-In Stems

- Self tapping screws
- 11.5 in/lbs screw torque
- 80 psi maximum cold inflation pressure
